SMM Technical Bulletin		
Bulletin Number:		
Subject:	Rear Door Strut Options	
Date:		

We are pleased to announce the release of rear door struts options for the V2 Canopy.

Rear door strut options are shorter in length which allows a reduction in the height of the rear door allowing the customer to carry longer items without the rear door impeding.

All parts are available ex SMM warehouse and pricing is the same as the standard gas strut found in your SMM spare parts catalogue.

Below are the part numbers and the difference in rear door height.

	(Standard)	(Option)	(Option)
Product code	2010707464SA	2010707464SA-M	2010707464SA-S
Size	430mm	410mm	390mm
Rear door canopy edge	80cm (standard)	74cm (-6cm)	66cm (-14cm)

Please see below examples illustrating the change in height of the rear door with the options available.

If you have any queries, please do not hesitate to contact us.

Yours Sincerely,
 Scott Adams
 Regional Sales Manager
